

Meescan: "Self-checkout in your pocket"

Meescan is the easiest way to checkout items in the library. No need to carry your library card around or stand in line at the circulation desk. Simply scan your books with your phone or tablet. It's an efficient and private way for you to borrow items from anywhere in the stacks.

This mobile app uses Bluetooth and geolocation technology, so **you must be in the library to activate and use it.**

Meescan works on any iOS or Android device, simply using the camera to scan barcodes.

Meescan is available in the app store and Google Play. Stop by the library and try it!
